MY EXPERIENCE

3 years experience with Laravel backend and 1.5 year experience with React frontend development

Tech Land company
- I worked with full-stack web developer position in Tech Land company from 2021-4-5 to 2023-8-1.

Trailblazer Software team
- I worked from 2023-9-1 to 2024-5-30 in Trailblazer Software team with Backend developer (PHP, Laravel) position.

ABOUT ME

I am a dedicated software developer with 3 years of experience in the field. My expertise includes HTML 5, CSS 3, JavaScript, jQuery, PHP, Laravel, React and MySQL database. In my most recent role, I served as a full-stack developer, where I honed my skills in developing robust and efficient backend systems.

Currently, I am expanding my skill set by learning React Native and Mongodb aiming to further enhance my capabilities and stay abreast of the latest technologies in the industry. I am passionate about creating high-quality software solutions and thrive in dynamic, collaborative environments.

EDUCATION

University of Computer Studies (Banmaw)

- Computer Science and Software Engineering
- Undergraduate

EXPERIENCE FROM PREVIOUS WORK

I worked as full-stack web developer position in a **Tech land** company. Because the company is a local business software company, it has gained good experience in business software.

The company was mainly involved in business and warehouse management software, so they gained experience in management projects. Therefore, due to my experience and active attitude, I can work as a good employee for your company.

Dear hiring manager,

I am writing to express my interest in the Software Developer position at your company, as advertised. With three years of experience in PHP, Laravel, JavaScript, jQuery, MySQL, and PostgreSQL, and an additional year working with React.js, Next.js, Node.js, Express.js, AWS, and various cloud and third-party services, I am confident in my ability to contribute effectively to your development team.

Professional Experience

Previous Job Title: Full-stack Developer
Company Name: Tech Land
Duration: 2021-4-5 - 2023-8-1

In my previous role as a full-stack developer, I was responsible for developing and maintaining software applications and websites using PHP, Laravel and React. My primary duties included designing and implementing RESTful APIs, managing database interactions, and ensuring application performance and scalability. Sometime, I collaborated closely with front-end developers to integrate user-facing elements with server-side logic, ensuring seamless user experiences.

Key Projects and Achievements

One of the most rewarding projects I worked on was the development of a comprehensive business system, POS Pro. This project involved creating a robust backend system with Laravel, integrating payment gateways, and implementing user authentication and authorization. I also optimized the database schema and queries to ensure fast and reliable data retrieval, which significantly enhanced the overall performance of the platform. This project is used to landlord and tenant for multi-database. When a customer registers to start using the system for their business, we build a tenant database and subdomain automatically.
Data management and analytics for tenant databases are complex and challenging.

Another project was a real-time chat application built using Node.js, Express.js, and Socket.io. This project not only expanded my knowledge of JavaScript frameworks but also provided valuable experience in handling WebSocket connections and real-time data updates.

Project Management and Team Collaboration

Throughout my career, I have demonstrated strong project management skills by leading multiple projects from conception to deployment. I have experience in Agile methodologies, which has helped me effectively manage project timelines, prioritize tasks, and deliver high-quality software on schedule. My ability to communicate clearly and work collaboratively with cross-functional teams has been a key factor in the successful completion of these projects.

Problem-Solving and Continuous Learning

I am passionate about solving complex problems and am always eager to learn new technologies. Whether it's debugging a challenging issue, optimizing performance, or exploring a new framework, I thrive on the opportunities to expand my skill set and contribute to innovative solutions. My commitment to writing clean, maintainable code and adhering to design patterns ensures that the software I develop is not only functional but also scalable and easy to maintain.

Conclusion

I am excited about the opportunity to bring my expertise to your company and contribute to your dynamic team. I am confident that my technical skills, project management experience, and dedication to continuous learning make me a strong candidate for this position. I look forward to the possibility of discussing how my background, skills, and enthusiasms align with the goals of your team.

Thank you for considering my application. I am looking forward to the opportunity to discuss my qualifications in more detail.

Sincerely,

Ye Aung Khant
